

Zon's Tribute & Tribute Pro Basses Feature Wood Necks, Traditional Tone

REDWOOD CITY, CA - December 15, 2003 (For Immediate Release) - Zon Guitars announces the addition of two new handcrafted wood-neck basses, the Tribute and Tribute Pro, complements to Zon's renowned composite-neck instruments. Designed to suit the needs of discerning players who want the "traditional" feel and distinctive tone that comes from wood necks, these models feature bolt-on maple necks and ash bodies sculpted for style, comfort, and balance. The tilt-back headstock optimizes tone and string tension, while custom electronics and specially designed narrow-aperture Seymour Duncan Custom Shop humbucking pickups capture the punchy, powerful sonic characteristics.

Tribute and Tribute Pro basses are available in 4-string and 5-string models. The 5-string models feature a longer (35") scale length and 19mm string spacing at the bridge, and in conjunction with the longer scale provide enhanced clarity and facilitate sophisticated right-hand technique.

Premium Aguilar electronics, a 3-piece premium quartersawn maple neck with graphite reinforcement, and a pau ferro fingerboard characterize the Tribute Pro, which is made entirely at Zon's Redwood City, California, shop. Standard features of the Tribute, which is made in Korea and set up in Zon's U.S. shop, include the same Seymour Duncan Custom Shop pickups as the Tribute Pro, plus European-manufactured electronics and a rosewood fingerboard.

The Tribute and Tribute Pro basses are available from all Zon Guitars dealers worldwide.
